

SRIJITH YAPARATHNA

Computer Engineer

Kandy, Sri Lanka | +94 77-8613-573 | syaparathne98@gmail.com | [LinkedIn](#) | [GitHub](#) | [SrijithYaparathna](#)

SUMMARY

I am a dedicated and results-driven Computer Engineering graduate with hands-on experience in Java, React, Node.js, Spring Boot, CodeIgniter 4, MySQL, MongoDB, Docker, and AWS. I completed an internship at KONGCEPT, where I honed my skills in full-stack development and cloud-based solutions. I am passionate about building scalable software, bridging the gap between hardware and software, and leveraging technology to deliver impactful solutions. I am now seeking a software engineering role where I can apply my technical expertise and strong work ethic to contribute to innovative projects.

EDUCATION

- | | |
|-----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2021-2025 | B.Sc. Computer Engineering , University of Ruhuna <ul style="list-style-type: none">Specialized in Computer Engineering in Faculty of Engineering |
| 2019 | GCE A/L Examination , Dharmaraja College - Kandy <ul style="list-style-type: none">Passed with 3Bs in Physical Science stream.District Rank – 57 (Z-core 1.5201) |

EXPERIENCE

Software Engineering Intern at KONGCEPT (Pvt) Ltd, Peradeniya, SL Jul. 2024 to Dec. 2024 (6 months)

During my industrial training at KONGCEPT (Pvt) Ltd, I gained hands-on experience in full-stack web development. I contributed to projects using CodeIgniter 4, Angular, Node.js, React, and Laravel, working on backend development, bug fixes, feature enhancements, and database management. This experience enhanced my problem-solving skills, collaboration with developers, and understanding of agile software practices.

TECHNICAL SKILLS

Programming	:	C, C++, C#, Java, Python, JavaScript/TypeScript
Web & Cloud	:	React, Node.js, Spring Boot, Docker, Kubernetes, CI/CD
Databases	:	MySQL, MongoDB
AI/ML	:	Scikit-learn, TensorFlow, PyTorch, LSTM, YOLO

PROJECTS

GROUP PROJECTS

Stall Reservation Management System – Colombo International Book Fair | Group Project

Developed a full-stack reservation platform for publishers and vendors to register, view stall availability, and reserve up to three exhibition stalls. Includes email confirmation with QR codes and an employee-only portal for organizers. <https://github.com/stall-reservation-system>

Technologies: Java, Spring Boot, Spring Security (JWT), PostgreSQL, React.js

Algorithm to Find the Cheapest Way to Source Ingredients | Data Structures & Algorithms

Implemented linked lists, arrays, and hash maps to compute the cheapest price list for recipes.

Technologies: C++ <https://github.com/srijithyaparathna/DSA-NEW-PROJECT>

Automated Infant Incubator Controlling & Monitoring System | Group Project

Designed an intelligent infant incubator system featuring automated environment control, vital sign monitoring, ML-based distress detection, and real-time dashboards using IoT integrations.

Technologies: Raspberry Pi 4B+, YOLOv8, React, ThingsBoard

https://github.com/sahanrashmikaslk/incubator_monitoring_with_thingsboard_integration

Appointment Management System | Web Application

A web application to manage day-to-day appointments between university staff and students.

Technologies: MERN, SQL <https://github.com/srijithyaparathna/AMS>

Student Management System | Desktop Application

Developed using C#, WPF, following the MVVM architecture for maintainable code.

Technologies: C#, WPF, MVVM <https://github.com/srijithyaparathna/GroupProject> 4307 4176

Socket Programming Chat Application | Console Application

Built a multi-client chat system using socket programming and OOP to handle concurrent communication.

Technologies: Java <https://github.com/srijithyaparathna/Java-Socket-Programming---Multiple-Client-Chat>

INDIVIDUAL PROJECTS

Modern React Admin Dashboard | Web Development

Built a responsive admin dashboard with scalable components, data visualization, and user interactions.

Technologies: React 19, React Router v6, Material-UI v7, React Pro Sidebar, @mui/x-data-grid, Formik + Yup, FullCalendar, @nivo Charts, Styled Components <https://github.com/srijithyaparathna/Build-a-COMPLETE-React-Admin-Dashboard-App--React--Material-UI--Data-Grid--Light-And-Dark-Mode>

SHOPCART – Full-Stack E-Commerce Web Application

Developed a full-stack e-commerce platform with secure authentication, product management, and payment processing. <https://github.com/srijithyaparathna/Build-a-Full-Stack-E-Commerce-App-with-Next.js--MERN--Tailwind-CSS--Sanity--Clerk--Stripe---Vercel>

Technologies: Next.js, React, Tailwind CSS, Zustand, Clerk, Sanity CMS, Stripe,

Parallel Implementation of Prim's Algorithm for Large-Scale Graphs | HPC Project

Designed and implemented serial, OpenMP, MPI, and Hybrid MPI+OpenMP versions of Prim's Algorithm to compute Minimum Spanning Trees (MST) on large 1000×1000 adjacency matrices. Evaluated performance, speedup, and accuracy across different parallel models. <https://github.com/srijithyaparathna/Prims-Algrothithm-HPC-Using-OpenMP---MPI>

Technologies: C++, OpenMP, MPI, Linux, GCC/G++

Supermarket Billing System | Console Application

Implemented a billing system using OOP concepts in C++ for modularity and reusability.

Technologies: C++ https://github.com/srijithyaparathna/SuperMarket_Biling_System

TECHNICAL SKILLS

Red Cypher 1.0 – 2024 – Won the third place.
